

UNIVERSITY OF OXFORD  
PART-TIME POSTGRADUATE PROGRAMME

# PAEDIATRIC INFECTIOUS DISEASES PROGRAMME

## POSTGRADUATE DIPLOMA IN PAEDIATRIC INFECTIOUS DISEASES

The Programme draws on world-class research and teaching in paediatric infectious diseases and offers a unique opportunity to gain an understanding of the principles that underpin paediatric infection, the ways in which those principles have developed, and to translate this understanding into good clinical and research practice. The Postgraduate Diploma also places the practice of paediatric infectious diseases in the broader context of applied sciences, such as pathogenesis, population biology and epidemiology.

“It concentrates on paediatric and non-tropical infectious diseases, hence is amazingly useful even for normal general paediatricians”

“Very well structured course. Interesting and constructive discussions with the tutors and the other students”

The Postgraduate Dipoma in Paediatric Infectious Diseases is a part-time programme taken over two years. It comprises a blend of tutored online modules and residential short courses. This is an advanced programme and is suited to those in full-time employment who wish to study in parallel.

There are three main teaching elements to the Programme:

- An online course in Paediatric Infectious Diseases, which runs for two terms each year
- Two (one each year) three-day residential courses in Oxford: Infection and Immunity in Children
- A PENTA-ESPID training course in paediatric HIV medicine, comprising of an online component and a three-day residential course in Rome.

The online topics covered are:

- Infection syndromes
- Therapeutics and infection control
- Epidemiology, immunity and immunization
- Invasive bacterial infections
- Important viral infections and prions
- Imported and tropical diseases and mycobacterial infection
- Neonatal infection and STIs
- The immuno-compromised host
- Fungal Infection
